Using Snyk with OIDC Single Sign-on (SSO)

The process of establishing trust between your identity provider and Snyk requires a few separate steps. Read Introduction to Snyk Single Sign-On for more information.

Snyk details you need to set up in your identity provider

Callback/ Redirect URIs	**https://snyk.auth0.com/login/callback**
OAuth Grant Type	Implicit (or Authorization code)

OIDC information to provide to Snyk:

Obtain the following information from your identity provider and organization. You'll provide this information to Snyk in order to establish trust on the service-provider side.

Issuer URL	The URL of the discovery document of the OpenID Connect provider you want to connect with
Client ID	Public identifier for the app
Client Secret	Only needed if the IdP does not allow the Implicit grant type
Email domains and subdomains	The email domains and subdomains that need access to the SSO
